

Pond Inlet

Pond Inlet is experiencing unfortunate events with the permafrost melting.

the hamlet may have to do a mass disinterment of old graves as
some of the coffins are exposed, slanted, or slight dent on the
grave

07/19/2017

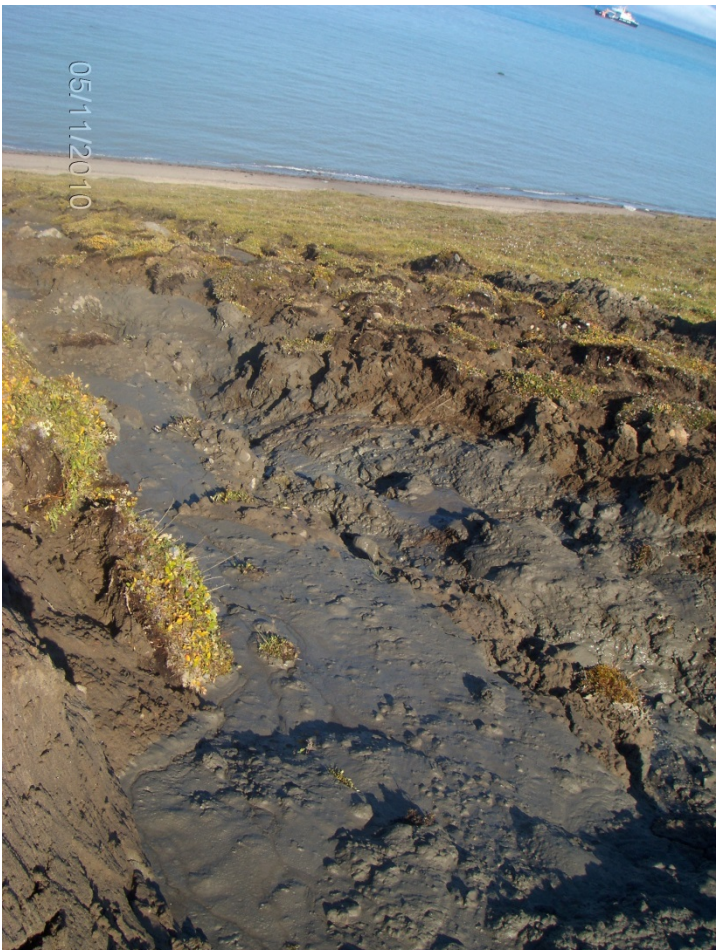

There was also a mudslide in 2010 – just a kilometre away from the cemetery.

Pond Inlet is experiencing unfortunate events with the permafrost melting.

he hamlet may have to do a mass disinterment of old graves as some of the coffins are exposed, slanted, or slight dent on the grave.

There were also 2 sinkholes in the community eroded from
streams or snow runoff. They were filled with rocks and sand to
fix.

And more sinkholes 12 kilometres
away from the community
